Object: Recommendation of Adina Kalmatova for the computer science post-graduate program

I, Paolo Sernani (ORCID: 0000-0001-7614-7154), currently Assistant Professor ("Ricercatore a Tempo Determinato – Tipo B") of Information Processing Systems at the Department of Law of the University of Macerata, given my research and teaching background in Artificial Intelligence and, specifically, in Expert Systems, Deep Learning, and hybrid techniques, and given my role as Thesis's supervisor of Adina Kalmatova, I am writing this letter to support her application and recommend her for the computer science post-graduate program at Your University.

Adina Kalmatova is an extraordinary student. As her thesis supervisor, I have seen many examples of her talent and have long been impressed by her diligence and work ethic. She can successfully complete multiple tasks with favorable results despite deadline pressure. As part of her ongoing graduation thesis in "International, European and Comparative Legal Studies" at the University of Macerata, we are working on a thesis entitled "Building AI Applications for the Legal System." Adina has demonstrated exceptional analytical skills and has made significant progress in supporting the development of innovative AI solutions tailored to legal challenges. Her work involves addressing ethical and practical implications of AI in the law domain, highlighting her comprehensive understanding of the field.

In addition to her research capabilities, Adina has consistently shown strong academic performance. Her above-average performance is a direct result of her hard work and strong focus. If your program seeks superior candidates with a record of achievement, Adina Kalmatova is an excellent choice. She has consistently demonstrated an ability to rise to any challenge she faces.

To conclude, I would like to restate my strong recommendation for Adina Kalmatova. If you have any further questions regarding Adina's abilities or this recommendation, please do not hesitate to contact me via email (paolo.sernani@unimc.it).

Best regards,
Paolo Sernani
